RHINOEX Rock Breaker Cartridge

Features

Full Body Ignition System

The most advanced and most efficient ignition system in the world.

Dual Ignition System

The safest and dual ignition system in the world.

Quatro Safety Steps

The world's only ignition system with four safety steps and easy activation.

Fireproof Enclosure

Cables suitable for all weather and ground conditions

Heavy Duty Wire

Cables suitable for all weather and ground conditions

Waterproof

100% waterproof

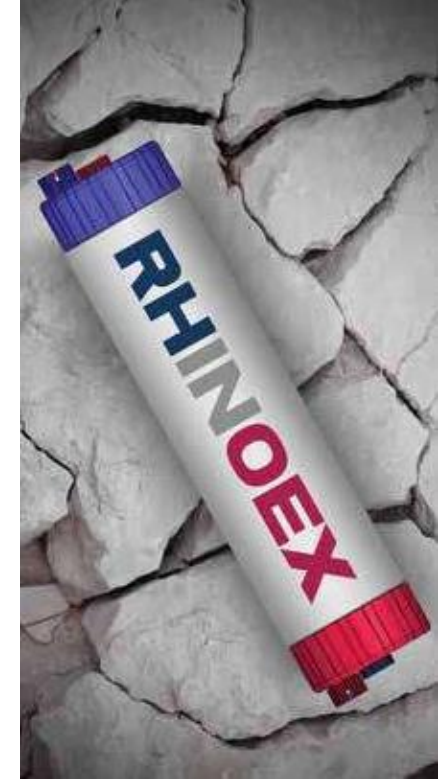

Super Seal

Vacuuming power for high crushing

Rhinoex brand pyrotechnic rock-breaking cartridges were created as a result of regular reporting of explosives engineers' experience gained in 16 years of field applications to the R&D department.

While the internationally patented special ignition system allows for more powerful crushing, it is maximized with four-stage safety measures. The products, which have the feature of not exploding even if triggered in an open area, are in UN0432 and 1.4S dangerous goods classes.

Safe and Strong

Product Range

*Optimum diameters produced for all blasting operations

- 84 mm rock breaker cartridge
- 42 mm rock breaker cartridge
- 29 mm rock breaker cartridge
- 16.5 mm rock breaker cartridge
- 10.5 mm rock breaker cartridge

Areas of Use

- Marble quarries
- Road constructions
- Urban foundation excavations and projects
- Channel blasting
- Tunnel blasting
- Subway blasting
- Dam and Hydroelectric projects
- Building demolitions
- All the Project which can not use conventional explosives

Blasting Services

Our team, which has 16 years of experience in the most efficient and economical application of Rhinoex brand pyrotechnic rock crushers, provides engineering and application services to our customers.
